

# Event Management System

Group 36

11010116: Cheruku Rama Krishna – [cheruku@iitg.ernet.in](mailto:cheruku@iitg.ernet.in)

11010127: Karra Dinakar Reddy – [r.karra@iitg.ernet.in](mailto:r.karra@iitg.ernet.in)

11010131: Prudhvi Raj Chowhan – [m.chowhan@iitg.ernet.in](mailto:m.chowhan@iitg.ernet.in)

11010139: Mohammed Riyaz – [m.riyaz@iitg.ernet.in](mailto:m.riyaz@iitg.ernet.in)

Before running, open the file 'events\application\config\database.php'

See the line no. 53 which says

```
$db['default']['password'] = 'killerdrama';
```

Change the password to the password of your MySQL.

Then, import the sql file 'events.sql' to your database.

Also, note that the files message\_put.php and message\_get.php should be placed along with the events folder and not inside the events.
